

SE3

ART AND INNOVATION

After years of transforming helmets into painted works of art, Troy Lee Designs decided it was time to apply our passion and experience to engineering one of our own. In 2003 the SE helmet was born.

The following 2015 collection of helmets is the culmination of countless hours of testing at the track and feedback from the fastest athletes on two wheels. Superior comfort, safety and fit combine with the striking style that TLD is known for to provide head protection unlike any other.

2015 MOTO COLLECTION

SE3

As the premier motorsports helmet in our line-up, the SE3 represents advancements of key, racer inspired features that make Troy Lee Designs helmets the benchmark with professional level off-road riders. The SE3 helmet utilizes innovative features that set it apart from the norm.

Highly developed materials and processes, advanced composites and hardware along with systems and designs exclusive to TLD keep you protected in the most critical moment.

SNELL M2010
APPROVED

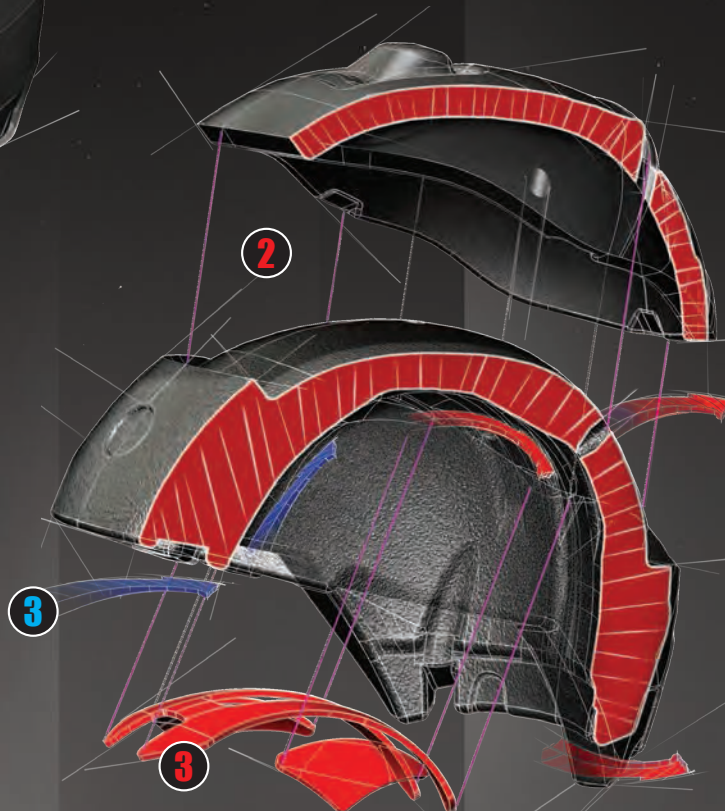

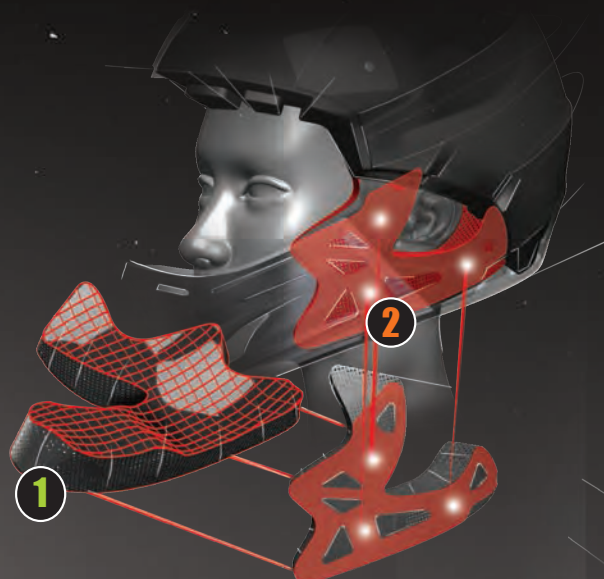

Exceeds SNELL M2010, DOT FMVSS 218 and CE 22.05 AS 1698 safety requirements and standards.

* Officially certified CE 22.05 helmets only sold by TLD Distributors in Europe.

* Officially certified AS 1698 helmets only sold by TLD Distributors in Australia.

Each SE3 helmet comes with 2 Vortex visors and a custom helmet bag with added pockets for accessories.

FEATURES

- 1 NEW FEATURE** - 3D contour cheek pads provide greater protection, secure and complete comfort fit.
- 2** Ultra lightweight machined cross-top titanium visor screws for durability and corrosion resistance.
- 3** Visor features single point adjustability for custom height placement even with gloves on.
- 4** Corrosion resistant titanium D-rings for superior strength and weight reduction.
- 5** Removable mouthpiece and top scoop for color customization or damage replacement.

FIT

- 1** Removable, replaceable and washable comfort liner features moisture wicking Coolmax® and Dri-Lex® materials for a dryer/cooler fit. The liner is constructed of 3 different foam densities that conform to the rider's head for a custom, tailored feel.
- 2** Removable cheek pads with additional sizes available to fit a variety of head shapes. Open cell foam and 3-layer mesh optimizes airflow and comfort.
- 3** Revamped rear neck pad adds support and increases helmet stability for a more secure fit.

SAFETY

- 1** Hand laid pre-preg carbon / composite shell with Kevlar® reinforcement in high impact zones.
- 2** Dual-density EPS liner decreases impact forces to the head and absorbs greater energy levels in more common low threshold impacts.
- 3** Inner shock pad system is paired with the dual-density EPS liner to help absorb smaller impacts, withstand multiple hits and add greater durability for the EPS liner.
- 4** Internal polyurethane chin bar liner with side EPS and dual-density materials for extra frontal impact energy absorption.

AIRFLOW

- 1** Aggressive top scoop and mouthpiece designed to channel more air through the helmet for added comfort.
- 2** Integrated injection molded brow intake system to channel air up and over rider's forehead.
- 3** Multi-level internal ventilation system built into liner for increased airflow.
- 4** 4 rear exhaust vents expel heat from inside the helmet.
- 5** Stainless steel mesh grills on all ports to keep out debris, but keep airflow at a maximum.

2015 MOTO COLLECTION

MAXIMUM VENTILATION

The AIR helmet was designed to provide optimum ventilation. The unique system incorporates intake ports at the top of the helmet, above the eyeport, and through the chin bar to deliver fresh, cool air. Exhaust ports at the back of the helmet quickly disperse heat, lowering head temperatures and keeping you cooler throughout your moto.

2015 MOTO COLLECTION

AIR

Our Air helmet is the embodiment of patented technologies that have made Troy Lee Designs a leader

ADVANCED PROTECTION AND PERFORMANCE

in the off-road helmet market worldwide. Each one is made with advanced materials and features that are common to all TLD helmets. From our unique pre-preg carbon / composite shell and forced air ventilation system to our dual-density impact liner, the Air helmet will give you the confidence to ride to your limits without sacrificing safety and style.

SNELL M2010
APPROVED

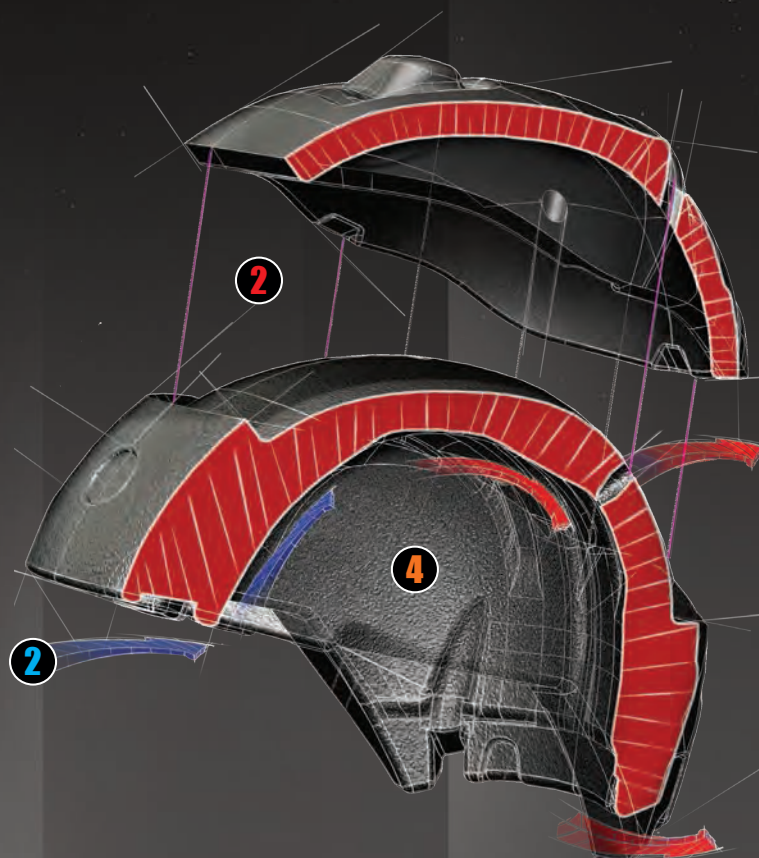

Exceeds SNELL M2010, DOT FMVSS 218, CE 22.05, and AS 1698 safety requirements and standards.

* Officially certified CE 22.05 helmets only sold by TLD Distributors in Europe.

* Officially certified AS 1698 helmets only sold by TLD Distributors in Australia.

Each Air helmet comes with a super soft helmet sock.

FEATURES

- 1** Ultra lightweight machined cross-top aluminum visor screws for durability and corrosion resistance.
- 2** Vortex visor features single point adjustability for custom height placement even with gloves on.
- 3** Stainless steel chin strap hardware for superior strength.
- 4** Removable mouthpiece for color customization or damage replacement.

FIT

- 1** Removable, replaceable and washable comfort liner features moisture wicking Coolmax® material.
- 2** Removable cheekpads with various sizes available to custom fit different head shapes.
- 3** Open cell foam and 3-layer mesh provides excellent air flow and comfort.
- 4** New and improved EPS liner form to adapt to a wider range of head shapes.

SAFETY

- 1** Pre-preg carbon / composite shell with Kevlar® reinforcement in high impact zones.
- 2** Dual-density EPS liner decreases impact forces to the head and absorbs greater energy levels in more common low threshold impacts.
- 3** Flexible vinyl nose guard aids in roost protection.
- 4** Unique polyurethane chin bar liner has an energy absorbing EPS core.
- 5** Breakaway nylon visor screw inserts shear away during severe crashes to reduce visor snag and potential increased injury.

AIRFLOW

- 1** Hi-flow intake vent provides increased airflow to your face.
- 2** Multi-level internal ventilation system built into the liner for increased airflow.
- 3** Integrated brow air intake vents provide superior ventilation.
- 4** 5 rear exhaust vents help expel heat from inside the helmet.
- 5** Stainless steel mesh grills on all ventilation ports to keep out debris, but keep airflow at a maximum.

Each Open Face helmet comes with a super soft helmet sock.

Exceeds DOT FMVSS, CE 22.05, AS1698 safety requirements and standards.

* Officially certified CE 22.05 helmets only sold by TLD Distributors in Europe.
* Officially certified AS 1698 helmets only sold by TLD Distributors in Australia.

FEATURES

- 1 Ultra strong stainless steel chin strap hardware.
- 2 Precision anodized aluminum visor snap nuts and chin strap washers for a quality look.
- 3 Dual position adjustable visor.
- 4 Chrome plated TLD emblem.

FIT

- 1 Comfortable open cell foam interior liner made with lambskin leather, synthetic microfiber suede, Dri-Lex® and synthetic leather materials.

SAFETY

- 1 Hand laid pre-preg carbon / composite shell with Kevlar® reinforcement.
- 2 Dual-density EPS liner that decreases impact forces to the head and absorbs greater energy levels in more common low threshold impacts.
- 3 Breakaway visor to prevent helmet snagging during impacts.

AIRFLOW

- 1 2 front brow intake vents to draw in cool, ambient air.
- 2 2 rear exhaust vents to expel heat from inside the helmet.
- 3 Metalized nylon mesh grills on all ports to keep out debris, but keep airflow at a maximum.

BUBBLE SHIELD

- The fashionable yet protective bubble shield comes standard with each helmet.

Steve McQueen™

Putting a new spin on an old classic. TLD revamped the design that launched the Open Face line a few years ago. Still inspired by the "King of Cool" the black and orange colorway offers a more vintage and rugged look that it's namesake would be proud to wear.
